

## Steps to Import .csv on Database

1. Go-to database ->Coplur(Custom database)
2. Right click on Coplur
3. Click on Task
4. Then click on Import Flat file
5. A pop-up window will occur :-
  - I. Click on next (Introduction section)
  - II. Locate your file, declare the table name and choose the schema
  - III. Then Preview your data and click next.
  - IV. Then modify the column if you want to, and then click next
  - V. Choose finish option.
6. Remove the null column or null row (if contain any).
